Your EarthCare™ Guide to Triple S Mops

Polyethyleneterephthalate or PET, is used for high-impact resistant containers. Everyday products such as soda and water bottles and many household products create PET waste. According to the Container Recycling Institute, more than 116 billion beverage cans and bottles are landfilled, littered and incinerated annually. When we are able to take ordinary PET plastic bottles and turn them into high grade dust control products we make a significant impact on everyday waste. Our Triple S Finish Mops are made with 42% post consumer content, of that, 19% is PET plastic. Although we believe that every little bit counts, we maintain the highest percentages of recycled contents in our products.

Our cotton wet mops contain post-consumer recycled cotton like this t-shirt. This cotton cut-end mop contains 93% PCC.

Old is Made New Again

Our mops not only contain high percentages of postconsumer cotton fibers, but PET plastics as well. We are consistently looking for ways to refine manufacturing processes to both reduce and reuse waste whenever possible. By utilizing a vertically integrated mop process we are able to benefit from the most ecofriendly products while maintaining excellent performance and durability. This is our commitment to the preservation of a healthy environment for all.

Just one of the ways to show our commitment

Our dedication to the environment goes far beyond the production of one "green" product. Many of our products contain the highest recycled content of any supplier in the industry.

Your Guide to Triple S Wet Mops

Product Quality

All Triple S mopping products are manufactured to high quality standards. They are specifically designed and manufactured for use in industrial and commercial maintenance applications – tough products for your tough applications.

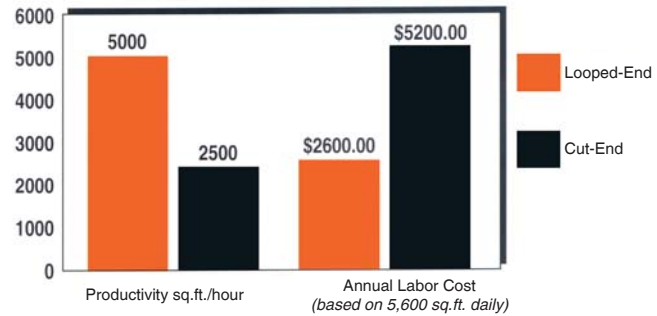

Initial Cost vs. Value Received

The dollars you spend on material and supplies are only about 10% of your overall cleaning budget. An extra dollar spent wisely on quality supplies will often save you that dollar many times over in LABOR expenses.

Looped-End Wet Mops vs. Cut-End Wet Mops

Cut-end mops appear to be a better buy as the initial cost is lower, but because of the looped-end mop's longevity and durability, it is a better overall value. In-use studies have shown that ONE SSS Super-Sorb Looped-End Mop will outlast EIGHT 4-ply Cotton Cut-End Mops. Plus, the Super-Sorb Mop cleans twice the area in the same amount of time. If your staff is mopping 5,600 sq.ft./day you will save about \$2,600 (labor savings) annually by changing from a cut-end to a looped-end mop!

Looped-End Wet Mop vs. Cut-End Wet Mop

Looped-end mops with tailbands cover a wider surface area evenly.

Cut-end mops offer narrow, uneven coverage.

About Mops

Wet mops are available with several time-saving options – each suited to a particular need. Consider these options to get the best value for the intended application.

Sta-Flat

Sta-Flat fixtures give the mop great maneuverability and performance. This simple design helps the mop lay flat on the floor to improve coverage. Detachable, interchangeable screw-on handles are used with Sta-Flat fixtures.

Tailbands

Tailbands prevent tangling and reduce snagging on furniture and obstacles. Mops with tailbands provide much greater surface coverage than ordinary cut-end mops, thus cutting your labor costs substantially.

Yarn Ply

Triple S offers mops in various yarn plies. Most mops are made with 4-ply or 8-ply yarn. Lower ply yarn will handle light to medium duty mopping and is excellent for general maintenance. A higher ply yarn handles the most abrasive surface with ease. When choosing higher plies you receive the added strength, but sacrifice a degree of absorbency.

Choosing the Right Mop

Evaluate the different yarn types available to get the best value for your intended application.

Yarn	Advantage	Disadvantage	Application
Blends	Blends combine several fibers to create a balance for price, performance and durability.	May shrink unless pre-laundered.	Professional use where quality and price are less of an issue than performance and durability.
Cotton	Absorbs and retains moisture. Low purchase cost. Minimal shrinkage.	Break-in required. Cotton may lint, dries slowly, will mold and mildew for shorter life.	General uses, such as mopping up liquids and scrubbing.
Rayon	Absorbs and releases moisture quickly. Dyes fast. Less lint. Resists mildew.	Shrinks when laundered. Less absorbent.	Applying finishes and disinfectants, etc.
Synthetics	Superior strength. No lint.	Higher initial cost. Poor absorption.	Rough surfaces and clean rooms.
Microfiber	Deep cleaning using fewer cleaning chemicals and water. Reduces cross-contamination risks.	Not suited for heavy soiled areas.	Damp mopping for light soil areas. Ideal for healthcare, schools, and offices.

Premium Wet Mops

SSS Premium Wet Mops have looped-ends that eliminate the problems of fraying and unraveling. A looped-end mop will provide the highest level of durability. They are designed to withstand repeated laundering, thus increasing product longevity. They will outlast ordinary cut-end mops 8-to-1.

All SSS Premium Wet Mops are made with a balanced blend yarn that provides you with the ultimate combination of absorbency, durability, performance and launderability. No break-in period is required.

Headbands

Headbands are available in two sizes: 1¼" and 5". Choose the headband based on your preference, considering your Wet Mop Hardware as each handle is designed to fit a particular headband size.

The open weave, synthetic mesh headbands are mildew-resistant and allow for faster drying. Headbands are color-coded by size. Yarn colors can also serve as a coding system for identifying usage by department and/or shift.

HEADBAND COLOR	LOOPED-END WET MOP
yellow	SMALL
green	MEDIUM
white	WHITE
red	LARGE
blue	X-LARGE

Blockade Wet Mop

Built-in antimicrobial protection makes this mop the industry's top performer.

- Blockade fights mildew and premature mop decay.
- Highly absorbent, 4-ply balanced tri-blend yarn is available in soil-hiding orange.
- Pre-laundered and pre-shrunk.
- Double tailbands standard on Medium, Large and X-Large.
- Tough polyester headbands available in 1¼" or 5" widths.
- Looped-ends.
- Launderable.

Super-Sorb Wet Mop

The highest quality mop available.

- Pre-shrunk and highly absorbent.
- Looped-ends.
- Launderable.
- Double tailbands standard on Medium, Large and X-Large.
- 4-ply balanced tri-blend yarn in your choice of blue, green, orange or white.
- Color-coded mesh headbands are available in 1¼" or 5".

Industrial Looped-End Wet Mops

Multi-purpose looped-end wet mop stands up to even the toughest commercial mopping.

- Looks great even after repeated laundering.
- 4-ply dual blend yarn is absorbent as well as durable.
- General maintenance mop is available in blue, green, orange or white.
- Color-coded mesh headbands are available in 1¼" or 5".
- Launderable.

An ideal Finish Mop offers high absorbency with quick release. Additional features include tailbands to ensure even coverage when applying finish. Choose synthetic yarn for the best performance in Finish Mops.

Tailbands

Tailbands improve coverage control. They enable the mop to cover a wider path, saving time and labor. Tailbands prevent tangling and permit laundering. When applying finish, tailbands eliminate streaking. Tailbands keep more of the mop on the floor for thorough and complete coverage. Better coverage equals improved utilization of labor.

Fantail Style

Standard Style

Level Best II Finish Wet Mop

Reduce fatigue with the Level Best II finishing mop!

★★★★

- Continuous filament, non-linting nylon yarn glides effortlessly over the floors, leaving a smooth, streak-free finish.
- Since nylon yarn does not absorb finish, it is applied directly to floors without waste.
- Clean up is fast and easy, reducing labor costs.
- Looped-end construction and single tailband increase durability.
- Headbands available in 1¼" or 5" widths.
- Launderable.

Finish Wet Mop

Easy to use and easy to clean, the SSS Finish mop readily releases and evenly spreads floor finish.

★★★

- Unique blue/white striped rayon blend yarn is easily identified to help prevent contamination.
- Tapeless tailband eliminates streaking and prevents tangling.
- Launderable
- White mesh headbands available in 1¼" or 5" widths.

Flat Finish Mops

Made with top quality, 100% nylon yarn for quick release of floor finish.

★★★★

- 5" wide mop is designed to provide smooth, even coverage.
- Durable half-sleeve, half-tie backing fits standard dust mop frames.
- Provides wider coverage area than a standard finish mop.
- Looped-ends won't tangle.
- Launderable.

Standard Wet Mops

All SSS Standard Wet Mops are available in three basic yarn types. Blend yarn balances durability with excellent pickup and absorbs 6-7 times its weight. Rayon yarn resists mildew and absorbs fast without moisture retention. Cotton yarn absorbs 2-3 times its weight, has excellent retention and a low initial cost.

All SSS Standard Wet Mops are available with Tailbands and/or Sta-Flat fixtures. Sta-Flat handles cause the mop to lay flat on the floor for improved coverage.

All SSS Standard Cut-End Wet Mops feature full ounce net weights. We pledge that when you order a 20 ounce SSS mop, you will receive a "full value" mop that weighs a true 20 ounces.

Blended Looped-End Wet Mop

The contractor's choice for quality and performance.

★★

- 4-ply cotton/rayon dref-spun yarn is ideal for everyday mopping.
- Not pre-laundered or pre-shrunk.
- Looped-end construction resists tangling.
- Single woven tailband provides wide surfaces span and even coverage.
- Long-lasting, double-wrapped mesh headbands.
- Not launderable.

4-Ply Blended Wet Mop

Rayon and cotton properties combine for great performance.

★★

- Tough, 4-ply blended yarn.
- Enjoy the fast pick-up properties of rayon with the superior water retention and durability of cotton.
- No break-in time required.
- Handles medium to heavy-duty applications with ease.
- Available in narrow and wide headband styles.

4-Ply Rayon Wet Mop

Fast absorption and quick controlled release.

★★

- Constructed with bright white, 4-ply rayon yarn.
- Expertly apply finish or germicide.
- Minimal linting.
- Rayon is fast drying and mildew resistant.
- Ideal for use in food service or healthcare situations.
- Available in narrow, wide and Sta-Flat headband styles.

4-Ply/8-Ply Cotton Cut-End Wet Mop

Economical choice for general maintenance and everyday mopping.

★★

- Cotton cut-end mops can be used for a wide variety of tasks.
- Choose from several yarn ply options to best suit your needs.
- Use 4-ply for everyday mopping.
- 8-ply mops are best suited for rough floors and heavy use.

Value Plus Wet Mops

Designed for budgets that require quality at a low cost.

- Several value-priced varieties available for great performance at a reduced price.
- Use in a variety of applications.
- Value Plus Looped-End Mops available in blue, orange, green or natural.
- Value Plus Blue & White Finish Mop available in 1¼" or 5" widths.
- Cut-End mop selections include cotton, rayon and blend yarn.
- Various colored blend yarns available for color-coding.
- Offered in narrow or wide headband styles with optional Sta-Flat and Fantail fixtures.

WET MOP HARDWARE

Triple S hardware for wet mops includes a variety of styles for simplicity and convenience.

Triple S offers four wet mop handles to accommodate every need.

A. The Clencher Handle is designed for 5" headbands. Its stainless steel spring and durable nylon resin helps prevent rusting and "gumming" up.

B. The Performer Handle is made of durable resin that resists cracking. A convenient locking adjustment wheel holds 1¼" headbands tight. The lever release system makes removal fast and simple. Available in wood or fiberglass handles.

C. The Sta-Flat Handle is designed for Cut-End mops with the Sta-Flat feature. The handy screw-type attachment makes it easy to install and remove mops. Available in 1" or 1½" handle sizes.

D. The Quick Change Handle is designed for use with 1¼" headbands. Its adjustable wing nut tightens to securely hold a narrow headband in place. Quick-release bar allows easy mop removal. Available in wood only.

Dust Mops

All SSS Premium Dust Mops are made with mildew resistant synthetic backing. This colorfast material is stronger and more abrasion resistant than canvas. Because it is non-absorbent and does not hold treatment, all of the dust mop treatment remains in the mop yarn where soil removal is taking place. SSS Dust Mops are available in two backing styles: Quick Change mops slide on and are ready-to-use, while Universal mops are equipped with a half-tie, half-sleeve.

Blockade Dust Mop

Built-in antimicrobial protection makes Blockade the longest lasting dust mop!

★★★★★

- Blockade treatment inhibits the growth of mold and mildew.
- Special protection extends life of yarn.
- Exclusive Endless Twist yarn construction for added durability.
- Pre-laundered.
- Date coded to demonstrate long mop life.
- Standard orange yarn with orange backing.
- Available with Quick Change or Universal backing.
- Launderable.

Endless Twist Colored Dust Mop

Professional's Choice for maximum soil pick-up and retention.

★★★★★

- Unparalleled durability handles the most demanding applications.
- Endless Twist yarn design won't fray or unravel.
- Pre-laundered.
- Date coded.
- Backing available in red, blue, yellow, green and orange.
- Quick Change or Universal backing available.
- Launderable.

Special Endless Twist Dust Mop

Superior dust control with tightly-twisted looped-ends.

★★★★

- Pick-up and retention capabilities of a cut-end mop with the durability of a looped-end.
- Endless Twist yarn will not catch on furniture or other obstacles.
- Pre-laundered.
- Date coded.
- Standard orange backing with natural yarn.
- Universal backing only.
- Launderable.

Synthetic Dust Mop

Great dust retention — no treatment required!

★★★★

- Static electricity attracts and holds dirt.
- Dry 75% faster than cotton mops.
- Looped-ends do not fray or unravel.
- Date coded.
- Launderable - do not launder with cotton mops.
- Universal backing only.
- Synthetic.

Value Plus Cotton Dust Mop

Hard working dust mop.

★★

- 4-ply cotton cut-end yarn for maximum dust pick-up with sewn construction.
- Durable, reinforced polyester backing resists wear and shrinkage.
- Universal 1/2-sleeve, 1/2-tie construction.
- Must be laundered in net.

Super Disposable Dust Mop

Pretreated for quick, easy dust removal.

★★

- Tough blended yarn construction.
- Open-twist blend yarn provides enhanced pick up.
- Performs well even during the most heavy-duty task.
- Pretreated for immediate use.
- Non-woven, full tie backing fits any hardware system.
- Available in blue, green and natural yarn for color-coding.
- Not launderable.

Economy Disposable Dust mop

Quality, 4-ply cotton dust mop.

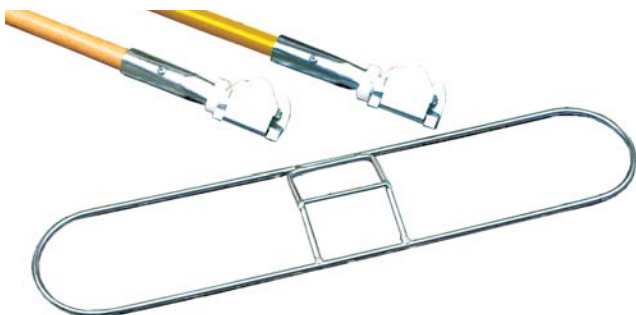

★★

- Ideal dust mop for price-conscious buyers.
- 4-ply cotton construction.
- Pre-treated to enhance performance.
- Non-woven, full tie backing fits any hardware system.
- Not launderable.

Dust Mop Hardware

Triple S dust mop handles and frames fit any dust mop style.

The Triple S dust mop handle uses an easy clip action to release a soiled mop and attach a clean one. The handle fits all sizes of mop frames. All Triple S frames are nickel chrome plated to prevent rust and made with heavy gauge steel for extra durability. Handles are available in 1" x 60" lacquered wood or 1" x 60" fiberglass.

Available in both 3" and 5" widths with lengths ranging from 12" to 72".

Microfibers

The U.S. Environmental Protection Agency published a fact sheet on Environmental Best Practices for Health Care Facilities based on a test they conducted regarding Microfiber Mops in Hospitals. According to this study, the microfiber program resulted in three measurable economic benefits:

- 1.) 60% lifetime cost savings for mops
- 2.) 95% reduction in chemical costs associated with mopping tasks
- 3.) 20% labor savings per day

The EPA also reported a significant cost savings from decreased water use and reduced workers' compensation claims with the use of microfiber products.

HD MicroPower Wet & Dust Mop Pads

*Save time and money —
less energy, reduced chemical use required.*

- Reduces chemical use, water and energy to clean.
- Reduces cross-contamination.
- Velcro backing for quick change.
- Electromagnetically-charged microfibers pick up and hold dust, dirt and grime.
- Ergonomic design and lightweight structure reduces fatigue.
- 18" and 24" size Wet Mop Pads available with colored binding to sort by use or area.
- Fringe edging on Dust Mop Pad picks up more dust.
- Launderable.

HD MicroPower Finish Pads

Applies floor finish in thin even coats.

- Blue/white stripe finish pads are great for applying floor finish in thin even coats.
- Yarn blend is 60% polyester and 40% nylon/polyester microfibers.
- Reduces chemical use, water and energy to clean.
- Reduces cross-contamination.
- Velcro backing for quick change.
- Ergonomic design and lightweight structure reduces fatigue.
- Launderable. Size available: 5" x 18".

HD MicroPower Scrubber Pads

Great for grouted surfaces or surfaces requiring scrubbing action.

- Polypropylene scrubber strips are great for deep cleaning.
- For grouted surfaces or any surfaces requiring scrubbing action.
- Reduces chemical use, water and energy to clean.
- Reduces cross-contamination.
- Velcro backing for quick change.
- Electromagnetically-charged microfibers pick up and hold dust, dirt and grime.
- Launderable. Size available: 5" x 18", 5" x 24".

No Lint Wet Mops

Non-linting, rough surface mop is the ideal choice for use in clean rooms, healthcare facilities and electronic and computer environments.

- Unique microfiber construction.
- Glides smoothly over rough, abrasive floors.
- Heavy-duty strands stand up to everyday mopping.
- Fantail style provides wide surface span and even coverage.
- Available with 1¼" or 5" headbands, medium or large sizes.
- Launderable.

MicroPower Dust Mop

Electromagnetic microfibers attract dust particles without treatment.

- Revolutionary construction: combines standard dust mop shape with innovative microfiber technology.
- Electromagnetically-charged microfiber loops deep clean large areas.
- Use with standard dust mop hardware.
- Launderable through 200+ washings.
- Sizes available: 5" x 18", 5" x 24", 5" x 36", 5" x 48", 5" x 60", 5" x 72".

MicroPower Carpet Bonnet

Ideal for maintaining high traffic carpeted areas.

- Superior absorption.
- Polypropylene scrubber strips.
- Mounts easily to any standard low-speed rotary floor machine.
- Requires a smaller amount of chemicals and water.
- Launderable.
- Sizes available: 17", 19".

MicroPower Flex Duster

Great for cleaning hard to reach spaces.

- Electromagnetically-charged microfibers attract and hold dust, dirt and grime.
- Microfibers provide superior absorption, making this cloth ideal for cleaning or dusting any surface, wet or dry.
- Especially helpful when cleaning tall and hard to reach spaces.
- Launderable.
- Size available: blue refill - 2.5" x 21", wand - 2.5" x 21".

MicroPower Cloth

Perfect for light dusting.

- Microfibers attract and hold dust and dirt.
- Microfiber construction provides superior absorption.
- Use wet or dry for cleaning any surface.
- Available in green, yellow, blue, orange, red, purple and white.
- Launderable.
- Size available: 16" x 16".

Specialty Products

Scrub 'N Clean Carpet Bonnets

The SSS Scrub 'n Clean Carpet Bonnet's unique design aggressively loosens soil and particle matter from deep within the carpet face and effectively removes it. SSS Scrub 'n Clean's construction provides the dual action of durable polypropylene fibers and absorbent blended yarn. Non-abrasive scrubbing strips won't damage carpet while effectively dislodging dirt and grime. Blended yarn efficiently absorbs moisture to prevent soil redepositing. For use with standard low-speed rotary floor machines in an interim carpet maintenance program.

Wedge Mop

The SSS Wedge Mop goes where regular dust mops can't. Excellent for corners, small areas and between furnishings. Perfect for fast clean-ups too. Constructed with orange, synthetic backing and your choice of white or orange Endless Twist yarn.

Carpet Cleaning Pads

SSS carpet cleaning pads, combined with your regular floor machine and pad holder or stiff brush, offer great cleaning performance on all types of carpeting -from level loop commercial to plush shag. SSS bright blended pas feature a rayon/polyester combination for greater absorbency and durability. The 1/2 loop-1/2 cut end construction offers excellent moisture retention and scrubbing power.

Janitor Duster

Get the maneuverability of hand dusting with the performance of a dust mop. Constructed with durable Endless Twist yarn, SSS Janitor Duster can handle your toughest tasks. Available in white or orange.

Split Duster

Save time and labor on cleaning hard-to-reach areas with the SSS Split Duster. Perfect for cleaning oddly shaped objects such as chair legs, curved pipes or light fixtures. Available in your choice of white or orange Endless Twist yarn.
