

CLEANVIEW

Large Capacity Dispensing System

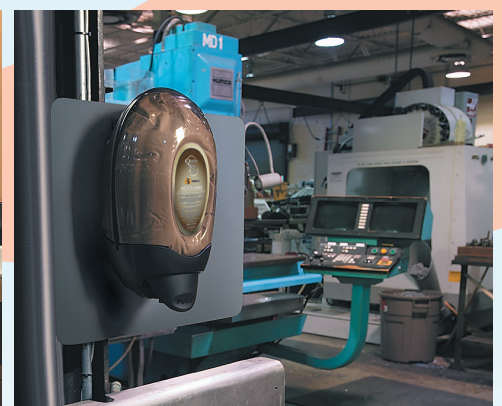

CleanView is the unique, technologically advanced Triple S Quality Skin Care dispensing system.

Sealed product bags are locked into durable, smoke-colored PVC cases. These cartridges are designed so that the maximum amount of product is stored in the least amount of space. The sleek, attractive cartridges are time-tested and completely waterproof. With their subtle, see-through appearance, they offer quick identification of product level. When it's time to add more product, just insert the new cartridge into the dispenser.

The large capacity of the CleanView System reduces maintenance costs by extending time between refills. The black CleanView dispenser accommodates both the 2000 mL and 4500 mL refills, to easily meet changing volume requirements. Dispenses 1.5 mL of liquid soap per push.

CleanView is the highly attractive, trouble-free solution to modern handwashing needs.
