| Viscosity: | Water thin |
| Foam: | Low |
| Phosphate: | None |
| Rinsability: | Excellent |
| Flash Point: | None |
| Storage/Stability: | 1 year |
| Weight Per Gallon: | 8.60 lbs. |
| Freeze/Thaw Stability: | Keep from freezing |

Description

Softens, conditions, and brightens carpet following extraction, bonnet cleaning or shampooing. Use with SSS PreTreat Plus or SSS Bio-Active Prespray for an effective two-step cleaning system. Mild acid formula neutralizes pH to prevent browning. Fragrance free.

Directions

Read all directions and cautions on the label prior to using. Consult the MSDS for recommended personal protection equipment.

Vacuum carpet thoroughly. Pre-test carpet for colorfastness in an out-of-sight area.

Prespray and rinse extraction: Apply your favorite SSS prespray to the carpet according to label directions. Allow the prespray to dwell for 5-10 minutes to loosen soil. Extract with Carpet Rinse Plus diluted at 1:128 (1 ounce per gallon of water).

To neutralize alkali residue: As a post rinse aid to neutralize alkaline residue from cleaning, Carpet Rinse Plus should be diluted at 1:64 (2 ounces per gallon of water).

For removal of browning: Dilute 1:32 (4 ounces per gallon of water), and spray the area lightly.

Important Notes: Wool carpets should be tested and extraction rinsed with a 1:640 dilution (1 ounce per 5 gallons of water). Follow the cleaning procedures specified by manufacturer of the cleaning equipment. Avoid overwetting the carpet. Do not mix with cleaning detergents. Add SSS Liquid Defoamer or Foam Eliminator to the recovery tank as necessary. After using this product, set the carpet pile and protect the carpet from furniture legs and bases while drying.

What the Pros Know

The mild acid formula of Carpet Rinse Plus removes alkaline residues from cleaning surfactants and allows the carpet to dry between 5 and 7 pH. This conditions the carpet and eliminates browning of the carpet caused by oxidation.
