*What the Pros Know*

When using Bonita apply a light amount of product to the surface that is to be polished. Wipe immediately using a microfiber or soft clean lint cloth until the surface is shiny.

*Description*

A superior blend of silicones, detergents, and lemon oils designed to clean, polish and protect Formica, laminate, vinyl, plastic, leather, stainless steel and other metals. Quickly and easily removes old wax build-ups and fills in minor scratches and cracks. Rubs out easily to a clear, bright, durable shine. A non-greasy protective finish is left that resists finger prints, smudges and further soiling. All surfaces are left clean, shining, and fresh smelling.
