SSS MULTI-PURPOSE CLEANING WIPES

- Features:** Heavy Duty Professional Strength Cleaner
Dual Sided Wipe – Scrubs and Wipes Clean
Removes Paint, Ink, Adhesive, Grease and More
Excellent for Hands and Hard Surfaces
- Description:** Hands and hard surfaces can quickly and are easily cleaned with the pre-moistened SSS Multi-Purpose Cleaning Wipe. Eliminates the mess of multiple cleaning products, soap, water, and paper towels. Everything you need comes in a handy, carry-anywhere container. No mixing, no guessing. Simply pull a wipe and go to work. Excellent for cleaning filthy hands without water or the mess of waterless hand cleaners.
- Markets:** Use this product practically anywhere. Industrial settings include factories, garages, HVAC/Electrical/Plumbing contractors, painters, carpet layers, bus barns, shipyards, train and aircraft repair, virtually any manufacturing or repair facility. Oilfields, marinas, truckers, railroads, tire shops, roofing contractors, printers, paper mills, and more are excellent places to sell this product. Institutional settings include schools, offices, hospitals, prisons, golf courses and country clubs, hotels, motels, bars, restaurants, and more. This product is a true all purpose cleaner but doubles as a waterless hand cleaner. *It is ideal for on-the-go hand care where water and soap are not available.*
- Demonstrations:** Obtain gear lube or anti-seize, spray adhesive, black permanent marker, and gold leaf paint from a crafts store.
1. On a dry hand, mark and “X” in your palm with the marker. Let dry a few seconds. Smear a thin layer of the gold leaf paint on top of the X and about the size of a silver dollar. Let dry a minute or so. Pull a wiper and point out the abrasive side with the gray swirls and the soft side. Use the abrasive side to wipe off the deposit from your palm. Flip over to finish. Wipe the soiled side on the back of your hand – point out how the wiper absorbs the material and does not redeposit.
 2. On your other hand, spray adhesive in your palm and allow to dry for a minute or so. Pull a fresh wiper and wipe your palm to remove the adhesive. Point out how the adhesive “balls up” and releases easily from this unique chemistry.
 3. Take the gear lube or antiseize and thoroughly coat your hands including fingernails and cuticles. Pull a wiper and go to work – watch how quickly and easily even the toughest of greases is removed from nooks and crannies.
 4. Go find anything on site that needs cleaning (except glass). You will be amazed at the performance of this product regardless of what is being cleaned. Office equipment is a great demo and your customer will appreciate their “like new” device.
- Notes:**
SSS Product #05279
Contains: 75 WIPES, 8”x12”(20.3 cm x 30.5 cm)
