

SSS GLASS & SURFACE PLUS WIPES

Features:

- *Professional Strength Cleaner for Use on Most Hard Surfaces*
- *Safe on Glass, Plastic, Video Displays, Whiteboards, Laminates and More*
- *Non-ammoniated, Non-streaking, Fast Acting*

Description:

SSS Glass & Surface Plus is the premier glass and surface cleaner plus the convenience of a pre-moistened non-linting wipe. It is an outstanding glass and mirror cleaner. It effectively and quickly cleans dirt, grease, oil, smudges, fingerprints, lipstick, and other stubborn deposits from windows, glass, mirrors, whiteboards, chalkboards, and more. The non-ammoniated formula is safe on plastics. Glass & Surface Plus is ideal for cleaning computers and displays, AV and photographic equipment, display counters and glass tabletops. The no-streak attributes make cleaning non-glass surfaces like reflective metals such as stainless steel, laminates, porcelain, tile, vinyl, and others a snap. The powerful formula, superior cleaning action plus a pleasant fragrance makes this an excellent all purpose cleaner throughout your facility.

Markets:

Use this product in Commercial and Institutional Cleaning, Automotive, Fleet, Marine, Aircraft, RV Maintenance and Detailing, Glass and Glass Product Manufacturing, Window/Windshield Tinting and Installation/Repair, and other applications where "Professional" performance and quality are required. It is safe to use on most other hard surfaces and materials. This product can also be used for cleaning plastic plants, TV/VCR repair, and other consumer electronics outer housings and screens.

Demonstrations:

Obtain a sample of any competitive glass cleaner wipes (Armor All, Athea) and this product plus the usual glass cleaner demo supplies such as a mirror, lipstick, etc. Now, take the Glass Cleaner Wipe Challenge!

1. Write or mark in two places on the mirror with the lipstick. Pull one wipe from each canister and compare the material of construction – you will notice the SSS Glass & Surface Wipe has a superior spun lace wiper which is softer, more absorbent, and more cloth like. Now, put one of theirs and one of ours in each hand and remove the two marks to test head to head. Press only hard enough to allow fluid to contact the deposit. Flip wipe over and go back over lightly to allow the deposit and remaining fluid to be absorbed back into the wipe. NOTE: You must not press hard and allow fluid to air dry – this may cause streaking. Just as with other glass cleaners, the wipe out, even with a premoistened wipe, is the key to streak free cleaning.
2. Now go find anything else to clean. This product works well as an All Purpose Cleaner and outperforms ordinary glass cleaners on practically everything. The versatile and plastics safe formula is ideal for video displays and CRTs so go clean one! Notice how easily both the screens and the housings are cleaned. Office equipment such as copiers and faxes are ideal demo sites especially where toner has been spilled – your customer will be amazed and appreciate the “like new” appearance after your demo.
3. Finally, ask to see any whiteboards. With a single wiper, you can clean fresh, old, even really old “ghost” writing from any kind of whiteboard. Point out how the dry erase dust is easily absorbed into the wiper eliminating waste and mess. Also note how safe the formula is for this use – the coating on the whiteboard will not be damaged even after repeated use.
