

ProTwin Deluxe

- DELUXE Features
- HEPA Filters
- Easy to Operate

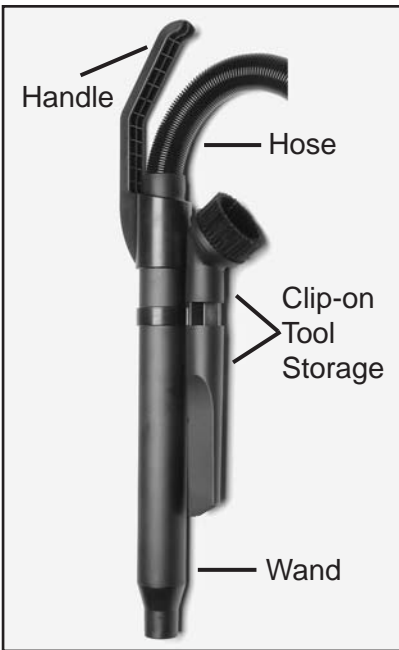

ProTwin Deluxe Upright Vacuum Cleaner

The SSS ProTwin Deluxe is a highly productive, 2-motor, upright vacuum designed for professional cleaning. It has been built for dependable service day in and day out, year after year. The special features make it more productive and easier to use.

Approved for use on
C & A (Collins & Aikman)
Powerbond Floor Covering

- The hose and wand are a single unit that quickly snaps out for above-the-floor cleaning. The special tools (*included*) are mounted directly on the wand so they are always at-hand and ready to use.
- A HEPA filter is standard equipment. The filter is easy to change by simply snapping open the door at the rear of the unit. No tools required.
- Exhausted air is directed down and to the rear of the unit. It does not stir up dust or papers in the area being cleaned. The result is improved air quality.
- The ProTwin Deluxe features a top-fill bag that is easy to change even when full. The drop-in-and-go feature means no mess, no bending and no lost time. The special filtration basket maintains the cleaning performance even as the bag fills to capacity.
- Includes performance features such as Full Bag, Brush Setting and Broken Belt indicators.
- Easier maintenance reduces downtime. The brush strip can be replaced without full disassembly of the head. A damaged power cord can be quickly and easily replaced.
- Other features include a redesigned vacuum head for small item pickup, easy to see controls, grounded plugs and static free hoses. Even a cord keeper has been included for your convenience.

Unique Cleaning Wand

Wand pulls out of vacuum easily. Built-in handle for improved control. Cleaning tools clip on to handle when not in use. Hose extends in use, stores easily.
