# TRIPLE S Floor Maintenance Pads

SSS Floor Pads are constructed with high quality fibers and are mineral-coated throughout for consistent performance for the life of the pad. Their open web design reduces buildup on the face of the pad for faster stripping, scrubbing, cleaning, polishing and burnishing performance.

Select the pad to match your job, equipment and specifications. The performance of the pad is dependent upon the pad pressure created by the machine used, the RPM it can generate, the floor finish used and, finally, your own personal evaluation of the results. We suggest that you consult the Floor Pad & Burnishing Pad Recommendation Charts as a first step towards selecting the best pad for you.

## Stripping

### High Performance Stripping Pads

(Conventional speed—175-300 RPM)
