

SSS Mopping Combo Pack SP 35 QT. Mop Bucket with Side Press Wringer

Item No. 16002

- Side Press Wringer is economical and withstands years of rough use.
- Wringer back is completely enclosed, which eliminates splashing and squirting while wringing a mop.
- Heavy-duty metal linkage and torsion return spring provide years of reliable service.
- Metal wringer parts have electrostatically applied black powder-coated paint which maintains appearance and extends wringer life.
- Hopper accommodates mops sized from 12-32 oz.
- Molded-in mop stick holder holds handle upright and prevents falling.
- Durable injection molded design is impact resistant, protecting it from breakage when dropped.
- The smooth and nonporous Derma-Tek® finish does not absorb chemicals or odors, and is easy to clean.
- Will not rust, fade, peel, chip, warp or leak – Guaranteed!
- Features 3" non-marking, grey casters.
- Designed to meet stringent GSA requirements - capable of withstanding over 250 lbs. of static pressure.
- Safety orange for high visibility.

SSS Mopping Combo Pack DP 35 QT. Mop Bucket with Down Press Wringer

Item No. 16003

- Down Press Wringer has heavy duty nylon gears that aid in directing force, which provides exceptional wringing action with minimal effort - this reduces operator fatigue and increases efficiency.
- Heavy-duty nylon spring provides years of consistent operation.
- Nylon pressure blades are designed to flex while focusing the force on wringing the mop, thereby reducing operator fatigue.
- All metal parts are electroplated with a corrosion resistant zinc coating to maintain appearance and extend wringer life.
- Hopper accommodates mops sized from 16-32 oz.
- Molded-in mop stick holder holds handle upright and prevents falling.
- Durable injection molded design is impact resistant, protecting it from breakage when dropped.
- The smooth and nonporous Derma-Tek® finish does not absorb chemicals or odors, and is easy to clean.
- Will not rust, fade, peel, chip, warp or leak – Guaranteed!
- Features 3" non-marking, grey casters.
- Designed to meet stringent GSA requirements - capable of withstanding over 250 lbs. of static pressure.
- Safety orange for high visibility.
