

Force4

Tile & Grout System

A comprehensive system for restoration, slip-resistance, and preservation of non-polished porcelain, ceramic, quarry tile, and grout.

Restoration • Slip-Resistance • Preservation

What is the Force4 System?

Force4 Tile & Grout System is a comprehensive system of chemicals designed for restoration, slip-resistance, and preservation of non-polished porcelain, ceramic, quarry tile & grout. Force4 is designed to be simple and efficient with four easy-to-use products that are highly effective. Simply prep the area, restore grout & tile, and seal!

Force4 Products

Assault™

Step 1:

This product gets you started by removing all dirt, oil, grease and other contaminants from the surface of tile & grout.

Advance™

Step 2:

Advance returns grout to new by breaking up and removing stain causing contaminants from deep within the pores of your grout lines.

Revive™

Step 3:

Penetrating deep into the pores of tile, Revive aggressively cleans and eliminates stains while opening pores in preparation for Shield penetrating sealer.

Shield™

Step 4:

Shield is a clear, penetrating treatment that crystallizes within the surface pores. The result is a clean, resilient, slip-resistant surface that will last for years.

What is so special about the Force4 System?

- Tile & grout look new again
- Safe and non-toxic with no harsh acids or fumes
- Cost effective, efficient, and user friendly
- Long lasting and durable with normal maintenance
- No topical applications to scratch, wear, fade or crack
- Increases slip-resistance
- Seals and hardens both tile & grout
- No long cure times, and resume normal traffic after just one hour
