TOWEL & TISSUE SOLUTIONS

Center Pull Towels Twin Jumbo Roll Tissue

- Enhanced Personal Hygiene
- Maintenance-Free Dispensing
- Cost-In-Use Solutions

CENTER PULL TOWEL SYSTEM

The SSS Center Pull Towel System combines touch-free dispensing and a maintenance-free system. Users only touch the towels they use – no buttons or levers to operate. The result is improved restroom hygiene for the user in a system with minimized cost-in-use.

SSS Center Pull Dispensers deliver one towel at a time...every time. Dispensers are made of virtually indestructible, textured polycarbonate. They contain no moving or metal parts, and no electronics to break or wear out. The patented dispensing cone is angled for easy user access. Refilling is easy with the double hinged cover that conveniently opens from the side. Users will appreciate the dependable dispensing of hygienic towels. Your staff will appreciate spending less time refilling and maintaining the system.

- Hygienic single towel dispensing
- Dependable maintenance-free operation
- Large capacity with easy and quick refilling
- Low initial cost with minimum cost-in-use
- ADA and HACCP compliant

Using Folded Towel Dispensers?

Save money by installing a SSS Center Pull Towel Dispensing system. One case of Center Pull Towels equals approximately 4 1/2 cases of Folded Towels. Make the change and you will reduce the amount of time and labor spent hauling around cases of towels, refilling dispensers and cleaning up the resultant mess. Studies show that:

- Users take two or three folded towels automatically even though they are not needed

- Folded towels are hard to remove from filled dispensers and many are wasted. Users are often frustrated as towels rip and then dispense in clumps.
- As folded towel dispensers run low towels fall out in clumps instead of dispensing one at a time. Many towels are wasted and the trash piles up quickly. Users are frustrated with the poor dispensing, empty dispensers and the resulting messy restroom.

Calculate your potential savings with the easy-to-use *Cost Per Hand Dry Comparison Form*.

TWIN JUMBO ROLL TISSUE SYSTEM

The SSS Twin Jumbo Roll Tissue (JRT) System provides dependable long-term service in high traffic restrooms. The dispensers are performance-designed to stand up to heavy traffic patterns and to maximize the time between service intervals while providing trouble free service.

The Dispensers are constructed with an attractive and easy-to-maintain textured finish. The high-quality polycarbonate cover stands up to heavy usage and resists vandalism. Overall durability is excellent due to two reinforced bottom hinges and a cover fitted into the grooved back plate for extra strength.

Cost-in-use is minimized by limiting user access to a new roll until the first one is fully gone. The SSS Dispenser uses 9-inch rolls with special 2.3" core for a 12% increase in capacity. The end result is less empty dispensers along with extended time between refills. Customer satisfaction is increased and your staff has to spend less time refilling and maintaining the system.

- Increased capacity for extended service intervals
- Maintenance-free design
- Low initial cost and low cost-in-use
- ADA compliant

Mini-Towel & Tissue System

The SSS Mini Center Pull Towel and SSS Mini Twin Tissue Systems provide dependable service over an extended period of time. They are best installed in the lower volume locations. They are perfect for office restrooms, doctor's offices and healthcare restrooms. They also are excellent for use in portable restrooms and in convenience stores. Built of tough polycarbonate, they provide maximum capacity in a minimum of space. Customers like them because of the dependable hygienic dispensing. Your staff will find that they spend less time refilling and maintaining the system.
